Something to suit every bathroom: TECEambia push plates

The TECEambia programme is specially designed for the TECE cistern. The push plates are available in both single and dual-flush versions.

- All plates can be used for top and front operation
- These timeless, neutrally designed plates suit all bathroom environments
- Stylish, small dimensions
- Double-sided rubber buffering prevents unpleasant rattling noises
- Sturdy mechanicals

Future-proofed cistern matching the flush handle

The TECEambia plates are the standard push plates for the TECE cistern. The cistern can be retrofitted with a high-quality toilet flush handle at any time without difficulty.

The first sealed cistern, fully pre-assembled:
Just connect and it's ready!

- The only cistern for the new flush handles
- Compatible with commercially available spare parts
- 10-litre safety tank - enough water when it matters
- Dual-flush technology to save water consumption (6/9 litre or 3 litre)
- Low noise – complies with noise control standard DIN 4109

TECEprofil universal module for dry wall construction

Order no. 9.300.000

820 mm TECEprofil universal module for low installation heights

Order no. 9.300.001

TECEbox - the TECE cistern for brick wall construction

Order no. 9.370.000

820 mm TECEbox for low installation heights

Order no. 9.375.000

For servicing the entire unit, including the lever mechanism, lid and push plate, can be removed in one piece. All settings remain unchanged.

The TECEantibac push plate supports toilet hygiene

The plate is made of a new high-tech plastic in which microscopically tiny silver ions are distributed. The silver ions inhibit bacteria growth and multiplication. This effect is permanent.

The Emco flush handle

A flush handle to match the TECE cistern

Leading manufacturers of bathroom fittings, such as DORNBRACHT, EMCO, JADO, HANSA and ORAS, present the flush handle in conjunction with TECE. The core component is the rotary mechanism developed by TECE. The manufacturers provide it with matching covers and controls.
